Your child is born to be successful

Your child is born with the potential to excel.

All you have to do is unlock it.

Potential is the latent quality or ability that every individual is born with. It defines who you are, what you can excel at, and what is possible for you to become. Finding your potential is crucial to build confidence and develop character. The earlier you develop it, the earlier you start your journey to success.
Discover your child’s potential with

‘Access to Success’

‘Access to Success’ is a holistic development program for children between 5-14 yrs. It combines the science of DMT application, with a whole brain development workshop ‘Access to Success’ redefines success for kids by providing them a platform to achieve their peak performances and live, a happy and powerful life. The analysts identify your child’s natural strengths, advise on the learning methods, discuss career options that best suit them and follow up with sessions to evaluate performance.

The program is implemented in 4 phases:

**Phase 1: Mapping the Innate Potential**
DMT identifies your child’s innate potential capability, personality and multiple intelligences. Each individual possesses different kinds, thus determining how they learn, remember understand and therefore performs accordingly. DMT studies the unique developmental potential within an individual, through fingerprint analysis and offers 99% accuracy proven globally.

**Phase 2: Developing The Potential**
A 2-day workshop increases your child’s brain ability through whole brain development stimulation techniques, with a focus on Midbrain activation. The Midbrain is the most important part of the brain that regulates left and right brain functions, boosting the brain’s processing power. This enhances your child’s overall intellectual, emotional and thereby, social development. A Parent Orientation session will give you an insight into the results achieved and input on how you can sustain your child’s excellence. 

**Midbrain activation = whole brain development**

**Learning techniques**
A combination of creative exercises and sound waves makes learning fun and interesting

<td>Concentration Exercises</td>
</tr>
</tbody>
</table>

**Phase 3: Way Forward**
- DMT Report to evaluate the child’s personality type and learning styles
- Identification of the high and low areas of innate intelligence
- Recommendations for discipline specialisation
- Tools and techniques to enhance the child’s mindset and achieve a higher performance

**Phase 4: Follow-up Sessions**
Additional activation sessions to reinforce and sustain the techniques learnt during the workshop.

**Immediate visible results**
- Children will be able to:
  - Identify colour, letters and words blindfolded
  - Walk or cycle around obstacles blindfolded
  - Perform mental mathematical calculations blindfolded
  - Speed Read
  - Develop a photographic memory

**Lifelong benefits**
- Greater academic prowess
- Enhanced social, kinesthetic, language, spatial and spiritual skills
- Heightened sensory perception and intuition
- Improved memory and concentration
- Comprehension
- Enhanced logical and creative abilities
- Improved self-confidence, IQ and EQ
The team

Access to Success is designed by Brain Barn Edu. It is based on a Nobel Prize winning program and endorsed by eminent professionals in the fields of Education and Child Psychology in India.

Dr Reema Shah
